

# Let My Light Shine

We've been through many stories  
rocked the bottom and reached the stars  
I touched my dream and I felt the pain  
but in you it's only love

Diggin' deep down in the dirt  
there in the darkness I seek the truth  
no way to see my roots  
but in you I found my home

Thanks for all you've done  
for being always patient with me  
I raise my voice and sing for you  
you are the light that shines through

**Let my light shine, how do you want me  
where do you need me, let my light shine  
how will I know, what's wrong or right  
please, let me know, or give me a sign**

*There's so many questions  
about who am I, and where I wanna be  
we are begging for the answers  
and for all the things, that won't let us free*

**How will I know, what's wrong or right  
please let me know, or give me a sign  
Let my light shine, how do you want me  
Where do you need me...**

**Let my light shine...**
