

Change The Future

There was a dream
helped me through
helped me move
all the big rocks
Along my way
so many reasons
For me to run and hide

I'm just a girl
what's my destiny
where can I see
what's my current plan
I stay strong and keep my thumbs
hooked inside the wheel

look ahead never mind
what's behind
can't be sure where I'll go
I'm on the road late at night
And letting my heart
take control

***But I'm still holding on
I'm holding on to my dream
holding on to what I believe
in right or wrong***

**I'll change the future
let the past pass
and keep one eye on history
I'll change the future
but time passes fast
to me it's a mystery**

**Let's change the future
let the past pass
and keep one eye on history**
